

# IRREVERSIBLE TEMPERATURE STICKERS PA0100

FAI Irreversible Temperature Labels are designed to protect the supply chain from claims that were a result of poor vehicle ownership. Each highly accurate label registers an increase in engine block temperature, providing a permanent record when reaching between 99-121 degrees Celsius (+/- 1.5c).

We recommend placing these at both ends of the head, preferably on core plugs. Supplied in quantities of 10 or a more cost-effective pack of 100, it is an essential for any engine technician.

**Dimensions: 18mm diameter**  
**Scale: °C**  
**Range: 99°C to 121°C**  
**Reaction Time: Max 4 sec.**  
**Colour change: one way permanent**
